Re: "MadeTheDean'sList"; 2020 Bay Thoroughbred gelding

To Whom It May Concern:

The above referenced horse presented to our hospital in May 2021 and was diagnosed with osteochondritis dissecans of the lateral trochlear ridge of the right femur. The condition was treated with stifle arthroscopy. He recovered well from anesthesia and during the post-operative period.

Sincerely,

A handwritten signature in black ink, appearing to read "Steph Caston". The signature is fluid and cursive, with the first name "Steph" and the last name "Caston" clearly distinguishable.
